Re: LSA Document #08-764 (Antidegradation)

Dear Ms. Stevens:

Clean water is so important to sustaining a livable planet! The above rule falls short of protecting Lake Michigan, it contradicts the intent of federal antidegradation laws. This proposed rule must be strengthened to protect water quality as the Clean Water Act intended.

I have such a hard time understanding why companies who pollute put profit over clean water and clean air. Do not the CEOs running these companies realize that they are harming themselves as well as the rest of us?

Sincerely,

Suzanne Jonson
